# Ahmed Saad

Junior Software Engineer  
Egypt

## Summary

I always loved computers and anything tech-related ever since I was little. After I finished high school and it was time to start college my dad decided that Mechatronics Engineering is an excellent major and the job market is in high demand. After finishing my preparatory year I fell in love with my programming course and I decided to switch majors to study Computer Engineering. Today, I am in Junior year and I never regretted my decision and never will.

During college, I Participated in US Embassy Hackathon and was placed 4th among 50 teams. Developed a number of software programs with high success levels. Finished a 2 weeks software development internship. Solved more than 50 programming problems on code forces and I absolutely love the dopamine rush of getting the Green accepted status.

The Digital/Computer industry is the future for the next decades and I am proud every day of the "Software Engineer" title.
